Everlink

Connections that Last Forever

A unified network connecting students, alumni, professors, batchmates with each other and research opportunities, internships and hackathons.

- Discover relevant **mentors**
- Find research and career **opportunities**
- Build complementary **teams**
- Find batchmates in **industry**

TEAM NAME
Hackora

TEAM MEMBERS
Kahish Balana , Avika Goel ,
Eshita Nagaria , Shreya Srivastava.

COLLEGE
IGDTUW

HACKATHON
HackShift

The Right Connection Shouldn't Be Hard to Find.

Students struggle to find the right seniors for specific guidance or referral

Research interests and professor profiles are hard to connect with student goals

Finding complementary teammates for hackathons and startups takes time

Achievements, internships, and opportunities are scattered across platforms

---

One unified platform connecting all pieces.

Not just a directory. A connected ecosystem that helps students discover **WHY** a person, project, or opportunity is relevant.

One Platform.
Six Ways to Unlock Opportunities.

01. INTENT COMPASS

Students state goals in engine
Ranked matches with explainable evidence

02. RESEARCH BRIDGE

Connect student interests & skills to professors , researchers & projects

03. SENIOR SUCCESS HUB

Discover seniors by achievements, internships
Request guidance

04. ALUMNI CONNECT

Alumni Internal Network
Connect with Peers in Industry
Alumni Reunions

05. VENTURE FORGE

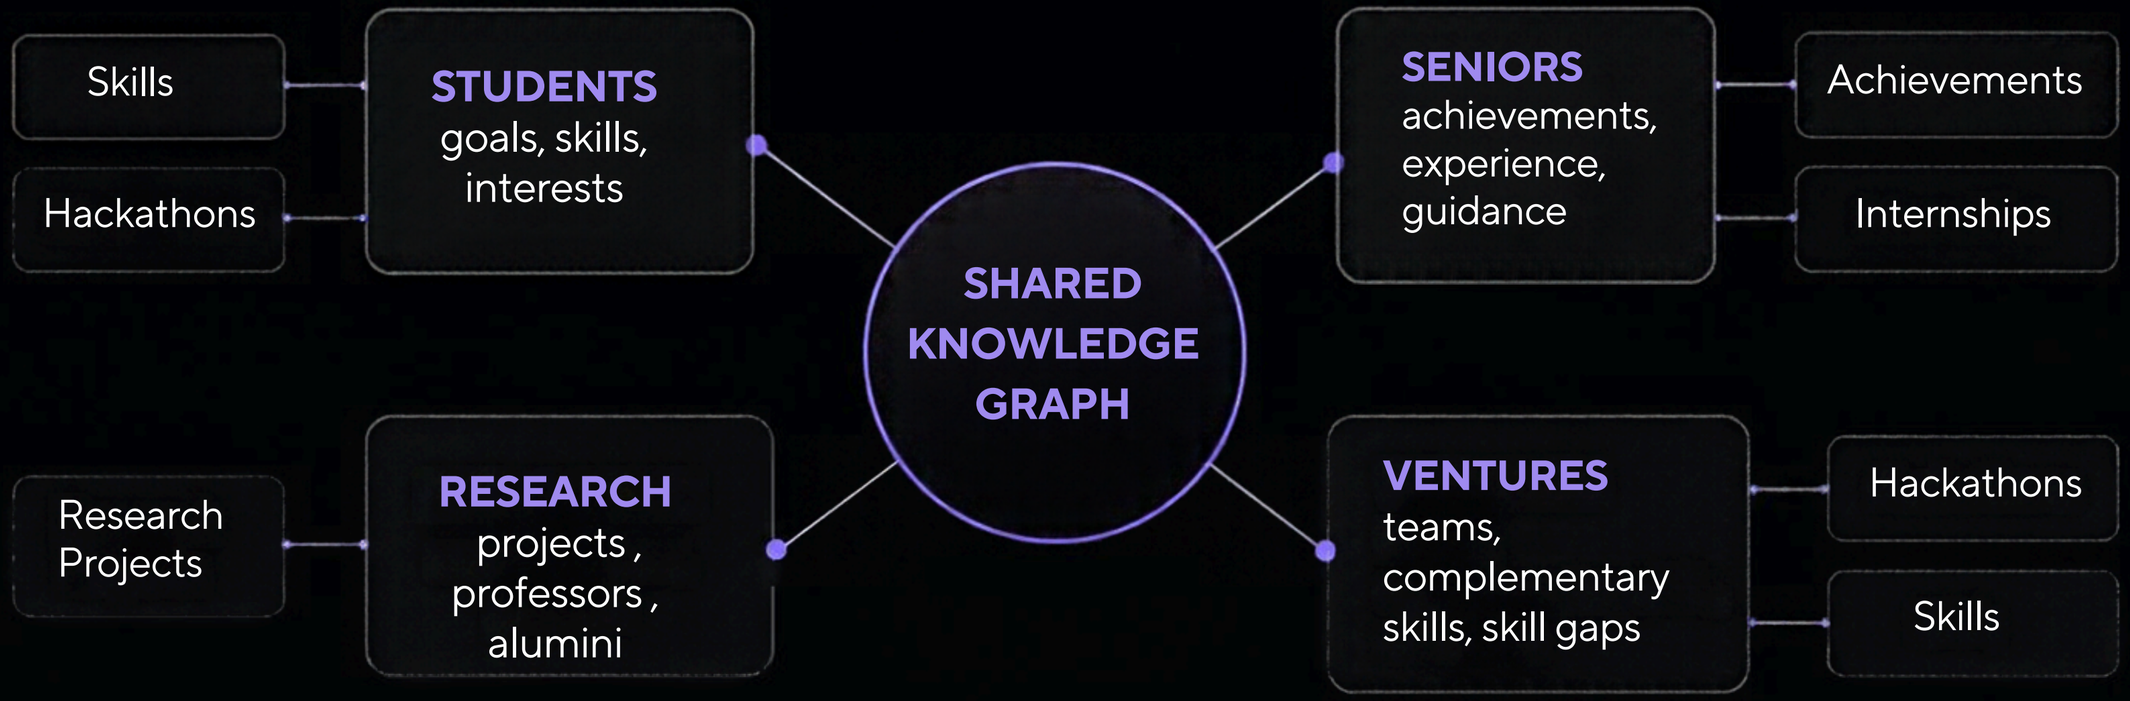

Find complementary batchmates and alumini using skills, interests, goals

06. ECOSYSTEM PULSE

Reveal skill gaps, emerging research interests, and needed opportunities

Not Separate Directories.
One Shared Knowledge Graph.

People and opportunities are **nodes**; skills, interests, achievements, relationships are **edges.**

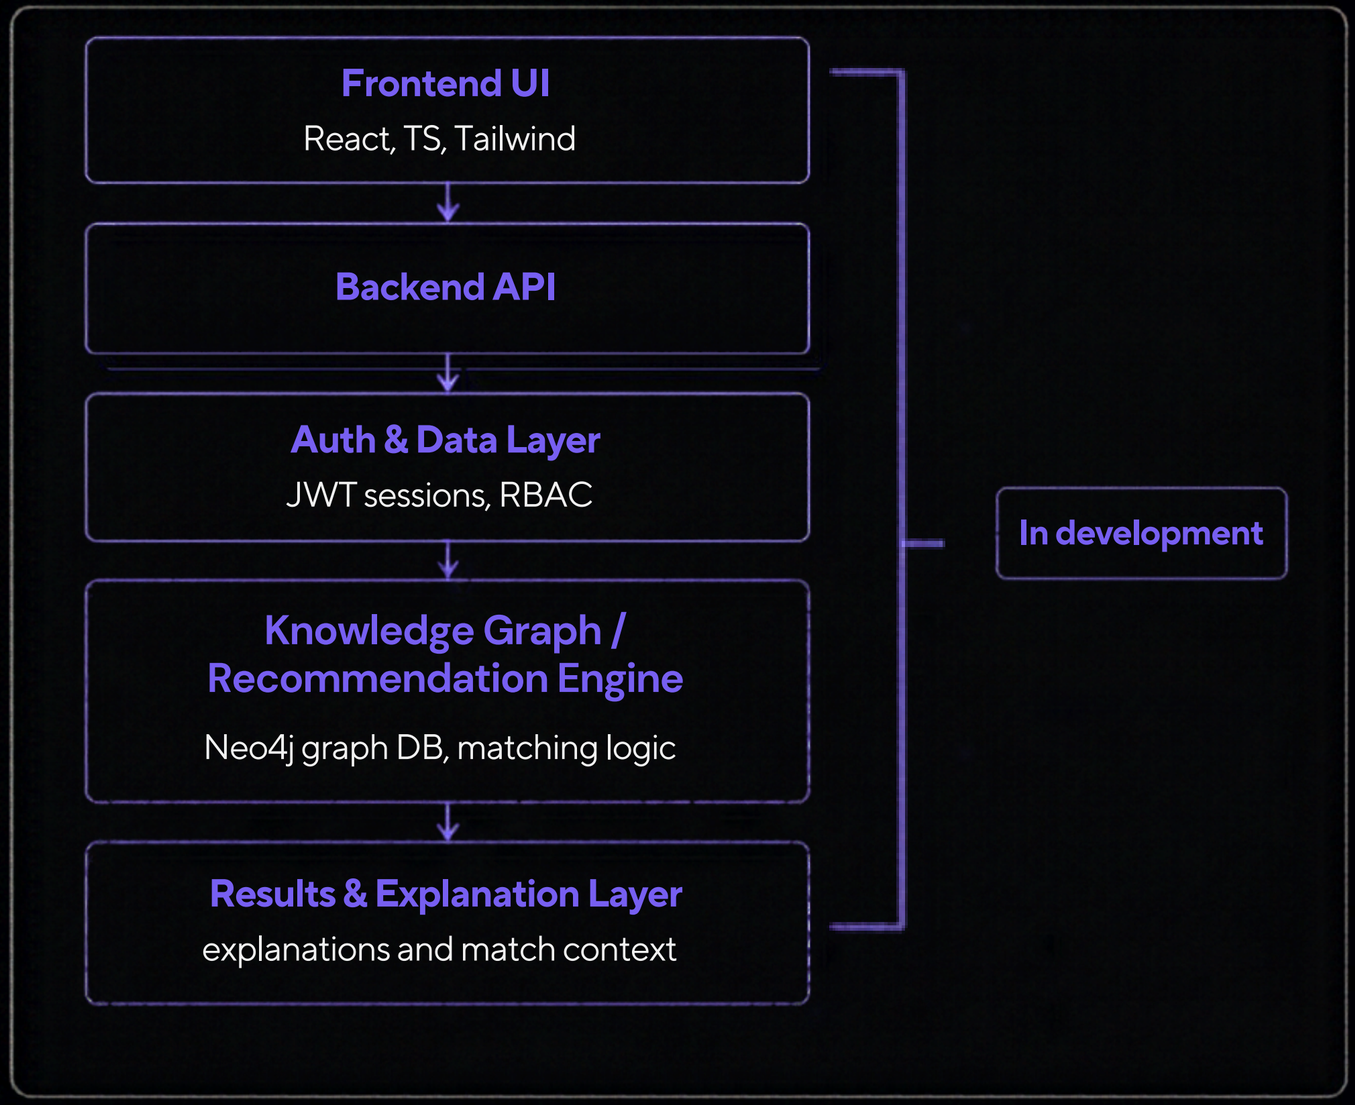

Graph reveals useful **indirect connections** missed by ordinary search.

One student skill can **reveal** a research project, a relevant senior, or the **right teammate.**

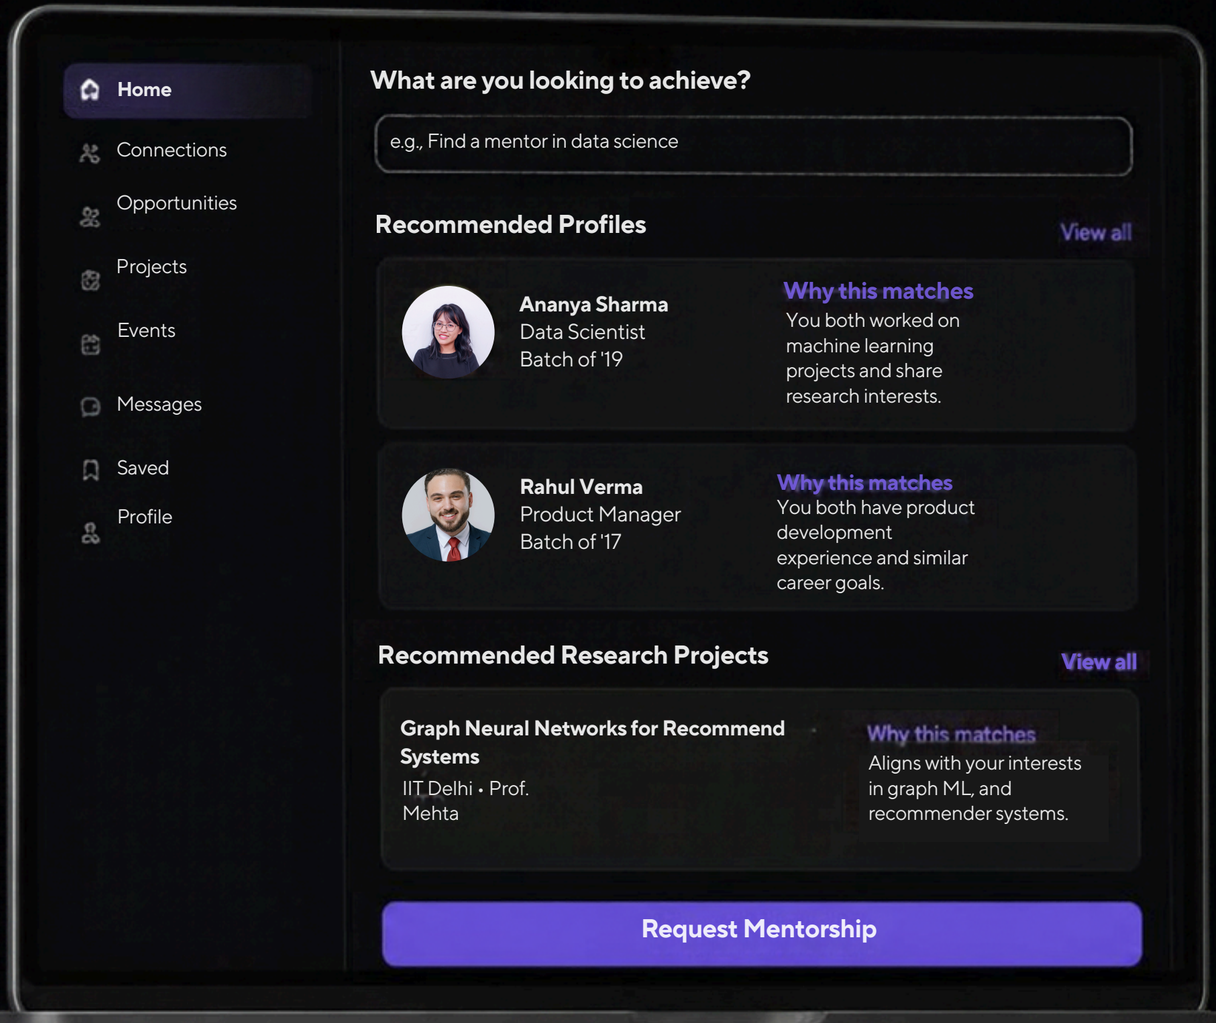

From Student Intent to Explainable Recommendations.

1. **INPUT**
   student enters goal, interest, or skill
2. **CONNECT**
   system identifies relevant profiles, skills, projects, achievements, relationships
3. **RANK**
   prioritizes matches based on matching evidence
4. **EXPLAIN**
   shows why each mentor, professor, opportunity, or teammate fits

Interested in **healthcare AI + Python** → discover related professor, senior, batchmates.

A Complete Platform, Built Around Real Student Needs.

IDENTITY & PROFILES

- Role-based authentication (JWT)
- Profile management (skills, mentorship prefs, socials)
- Password reset via email

ALUMNI & COMMUNICATION

- Dynamic alumni directory with filters and mentorship badges
- Real-time chat with file attachments and history

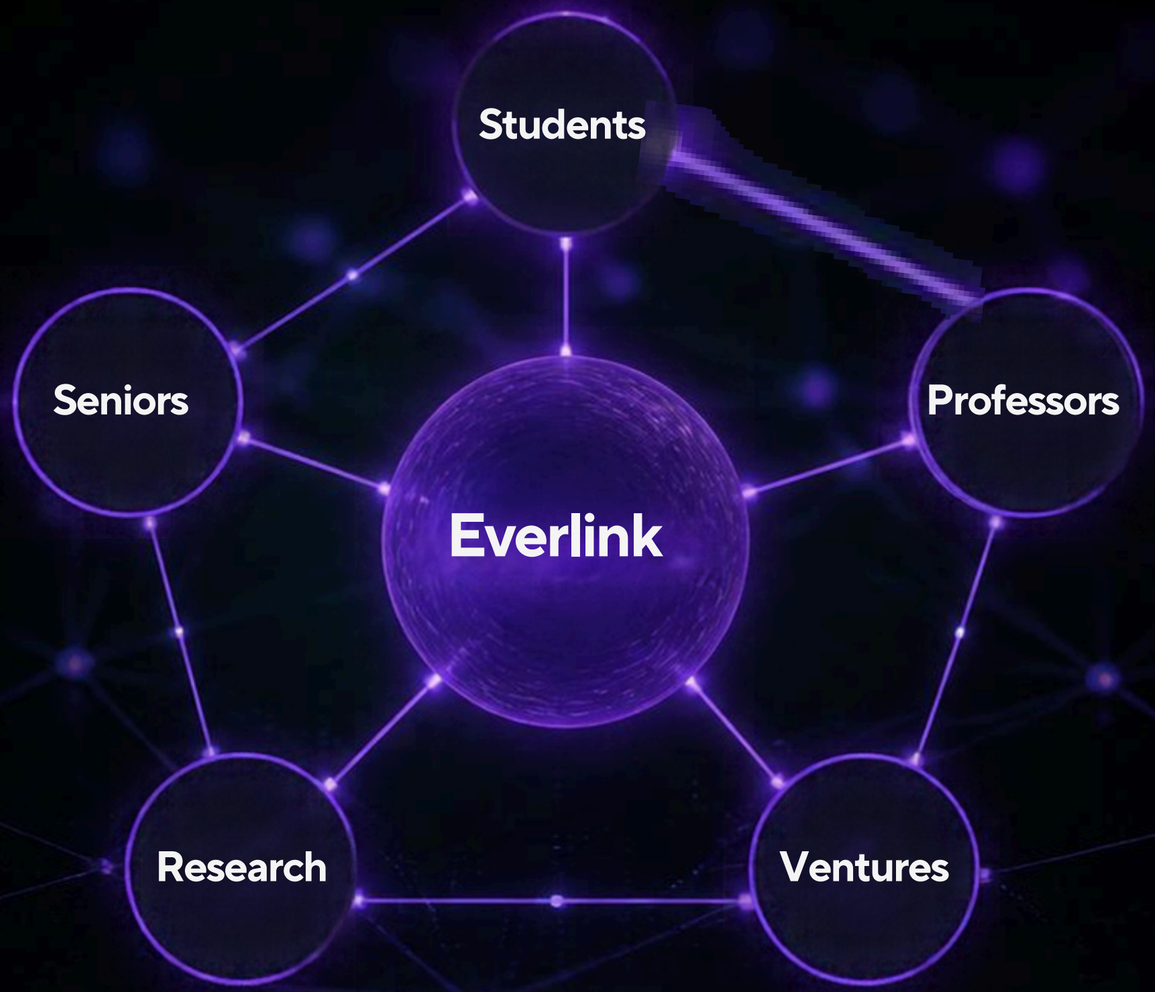

OPPORTUNITIES & CAMPUS

- Opportunities board with save and open application links
- Saved opportunities list
- Event management and registration
- Campus gallery browsing

ADMINISTRATION & UI

- Admin dashboard for content and user verification
- Centralized frontend API client and error handling
- Responsive UI powered by Tailwind CSS
- Reusable UI foundations (cards, panels, headers, forms)

Thank You
